1. INTRODUCTION

This is the thirty-ninth issue of the 'European Coffee Report'. The European Coffee Federation (ECF) continues this series with the report over 2018/2019. Unfortunately, we are unable to present country chapters as we did until a few years ago. It has become increasingly difficult for many national associations to obtain data from their national statistical offices. This has been partly compensated by including data from Euromonitor International, which we trust continues to be an important and welcome addition.

The European Coffee Report is available only in electronic format on the ECF website.

Disclaimer: this report is for information purposes only. No rights or obligations can be derived from its contents.

This report was finalised in May 2019

2. CONVENTIONS, NOTATIONS AND DEFINITIONS

Coffee units:

In these reports we will mostly use metric data (tonnes and kilograms) since the use of bags as reference has been phased out. Some tables include data in bags in addition to metric data:

- Bags are bags of 60 kilograms
- Tonnes are metric tonnes (1,000 kilograms)

Conversion factors:

The recalculation of roasted and soluble coffee uses the conversion factors as approved under the International Coffee Agreement 2007 (ED 2123/11 of 20 October 2011):

- from roasted to green: multiply by 1.19
- from soluble to green: multiply by 2.60
- from green decaffeinated to green: multiply by 1.05
- from roasted decaffeinated to green: multiply by 1.25
- from soluble decaffeinated to green: multiply by 2.73.

Green coffee equivalent is the aggregated volume of green, green decaffeinated, roasted and soluble coffee recalculated to green coffee with the above conversion factors.

Notations:

In the notation of figures, the convention of written English:

- the thousands separator is the comma (,)
- the decimal separator is the dot (.)

For large numbers the so-called 'short scale' is used: 10^6 = one million, 10^9 = one billion, 10^{12} = one trillion.

Currencies:

Abbreviations of currencies are those used for international banking purposes, based on ISO standards.

Data:

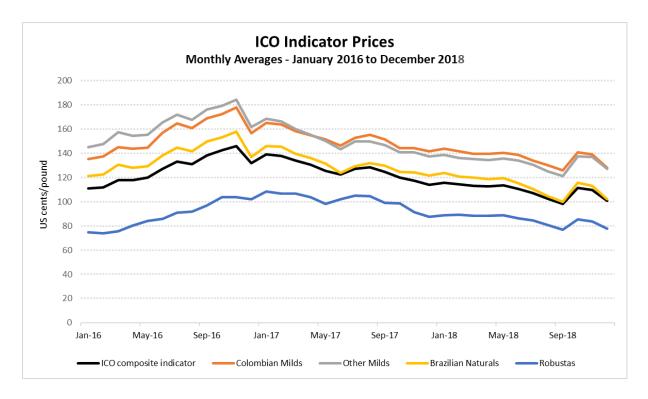

Eurostat trade figures may differ from those available from national sources.

Distribution of green coffee imports by types of coffee:

Distribution of green coffee imports by types of coffee is based on the following grouping of coffee producing countries applied by the International Coffee Organization:

	Arabicas		Robustas

4. EU28 GREEN COFFEE IMPORTS: VOLUME, ORIGINS AND TYPE OF COFFEE

The terms 'Western Europe' and 'Central and Eastern Europe' are not strictly defined since many Central and Eastern European countries are now members of the EU. In this report, the 'Western Europe' region includes all EU28 countries plus Switzerland, Norway and Iceland. The 'Central and Eastern Europe' region currently includes Albania, Belarus, Bosnia and Herzegovina, Georgia, North Macedonia, Moldova, Montenegro, the Russian Federation, Serbia and Ukraine.

Notes: Figures show imports of green coffee, not decaffeinated for the EU, Norway and Switzerland (HS 09011100). For other countries, imports of coffee in all forms are reported.

In 2018 those countries included in the 'Western Europe' region imported 3.61 million tonnes of green coffee, representing a 6 .5% increase compared to 2017 when 3.39 million tonnes of green coffee were imported. EU28 countries absorb 94.7% of total green coffee imports into Western Europe with 3.42 million tonnes in 2018. Total EU28 green coffee imports edged up by 5.6% in 2018.

Among EU28 countries and taking the 2016-2018 period into account, markets showed mixed results with 13 of them showing a negative importing trend and another 15 increasing their imports. As usual, small markets showed greater volatility. The fastest growth was registered in Malta (+3,300%), followed by Cyprus (+90.9%) and Slovenia (+83.1%). More relevant, given the size of their markets, is the positive trend experienced in Poland (+18.6%), The Netherlands (+9.2%), United Kingdom (+9.0%), France (+7.2%) and Italy (+5.8%). EU28 countries posting sharp decreases in green coffee imports during the same period were Greece (-34.6%), Romania (-16.3%), Finland (-14.2%), Croatia (-13.1%) and Denmark (-11.4%). Among the largest importers it is worth mentioning Belgium with an 8% reduction in its imports during the same period.

The 'top 20' sources of EU28 green coffee imports (excluding intra-EU trade) in the 2016-2018 period (listed according to 2018 volumes):

Source: Eurostat

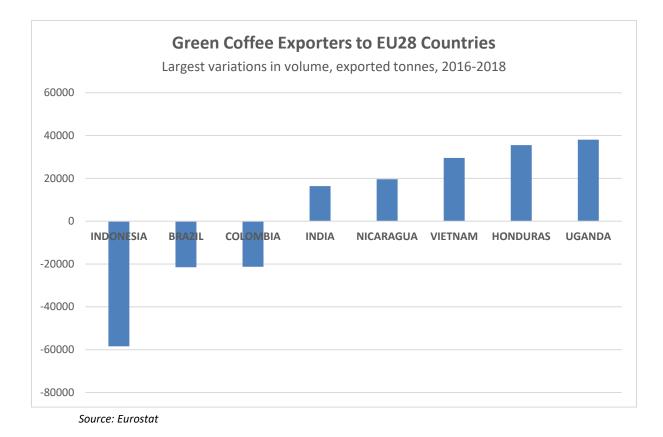

Brazil was again the largest source of green coffee imports for EU28 countries, supplying 900,193 tonnes or 30.1% of total EU28 green coffee imports. Vietnam supplied another 758,618 tonnes or 25.4% of total imports. These two origins have consistently ranked as the top-two suppliers to EU28 countries and they typically supply approximately 55% of total green coffee imported. After a slight decrease in their combined market share in 2017, they bounced back in 2018 reaching a 55.5% combined share of total EU28 imports. Brazil has seen its share of total EU28 imports of green coffee bounce back from 29.5% in 2017 to 30.1% in 2018, adding 59,544 tonnes in exports to EU28 countries. Vietnam substantially increased its market share in 2018 after exporting 97,696 additional tonnes to EU28 countries, reaching 25.4% of total EU28 imports (23.2% in 2017). The third top exporter, Honduras, joined the positive trend with its share increasing to 7.6% in 2018 from 7.4% in 2017 after adding 17,064 tonnes exported to EU28 countries.

Colombia was the only top-5 exporter posting a decrease in its exports to EU28 markets. Its market share decreased to 5.8% in 2018 (6.6% in 2017) after exporting 172,380 tonnes (-14,595 tonnes). Uganda is consistently increasing its exports to EU28 countries, reaching 161,520 tonnes in 2018 (+12,183 tonnes). Uganda's market share climbed to 5.4% (4.1% in 2016).

In 2018 Indonesia has represented a special case among coffee exporters to EU28 countries. Indonesia exported 64,512 tonnes in 2018 to EU28 markets, a whopping 54.2% drop compared to 2017. According to Reuters, this substantial decrease has two explanations. On one side Sumatra experienced a poor harvest in 2018 but, more importantly, coffee consumption in Indonesia, particularly for Sumatra's Arabica beans, has doubled since 2010, making the country among the fastest growing coffee markets in the world according to the USDA (United States Department of Agriculture). Increased coffee consumption in a 200 million consumers market has made Indonesia disappear from the Top 8 of coffee exporting countries to the EU28 and this trend could be replicated by other exporting countries as their domestic coffee markets develop.

Source: Eurostat

Although data from Eurostat are perfectly reliable, real imports by origin or type of coffee are practically impossible to determine with any accuracy. Intra-EU trade represents a relevant share of traded green coffee and, for the case of intra-EU trade, Eurostat's country statistics do not reveal the country of production of green coffee. When arriving to major coffee ports in the EU, the origin of green coffee may be recorded as Germany when it reaches the Port of Hamburg or Belgium when unloaded at the Port of Antwerp. The share of the intra-EU trade is quite high with Belgium ranking as the 4th top origin of green coffee imports to the EU with 179,986 tonnes in 2018 and Germany supplying 175,867 tonnes to EU28 countries ranking as the fifth biggest supplier.

Therefore, analysis of green coffee imports to EU28 based on Eurostat data indicate trends rather than fully accurate figures. The same rule applies to the breakdown of green coffee imports by type of coffee. The following table is thus provided as reference for EU28 green coffee imports by type of coffee:

EU28 Imports per Type of Coffee % of total green coffee imports							
	2017	2018					
Arabicas	62.9%	60.5%					
Brazilian Naturals	32.3%	33.2%					
Colombian Milds	8.2%	7.2%					
Other Milds	20.5%	20.1%					
Robustas	34.8%	35.4%					
Others	2.3%	4.1%					
TOTAL	100.0%	100.0%					

Source: Eurostat. Intra-EU trade excluded. Totals may differ from the sum of the items due to rounding.

The overall ratio Arabicas/Robustas seems to remain stable at approximately two-thirds to one-third (60.5% Arabicas in 2018 compared to 35.4% Robustas). Within the Arabicas, the share of Brazilian naturals recovered mimicking Brazil and Ethiopia's exports growth. Other Milds slightly decreased while Colombian Milds lost one percetange point in market share with substantial drops in exports from Colombia, Kenya and Tanzania.

Source: Eurostat

Although green coffee imports represent more than 95% of the total volume of coffee and coffee-related products imported into the EU28 area, the analysis of other coffee products is also relevant in order to better understand the European coffee market. **Green decaffeinated coffee** imports are increasing substantially in the last few years (approximately 40% increase in volume since 2015). They reached 14,609 tonnes in 2018 after growing by 10.8% compared to 2017.

Imports of **roasted regular coffee** are also following a sustained upward trend. In 2018 they jumped to 62,674 tonnes in 2018 (+11.4%) while imports of **roasted decaffeinated coffee** also experienced a sharp increase reaching 5,478 tonnes in the same year (+14.7%). Imports of roasted coffee in the EU28 area are basically the result of trade with one commercial partner: Switzerland. EU28 countries imported 61,319 tonnes of roasted coffee (regular and decaffeinated) from Switzerland in 2017 (+17.0% compared to 2017), a figure that represents 90.0% of total imports of roasted coffee from outside EU28. Other non-EU28 origins have seen their exported volumes of roasted coffee to EU28 countries sharply decline. Imports from the United States amounted to 1,082 tonnes in 2018 (-58.2%) and Brazil supplied 698 tonnes (-36.8%). However, these two origins currently represent 1.6% and 1.0% of total imports respectively. As a curiosity, Syria has consolidated its position as the fifth largest supplier of roasted coffee to EU28 countries with 637 tonnes in 2018 (+11.0%).
